

Why Accident Insurance matters

Accidents can happen anytime, anywhere and when you least expect them. While you can't plan for the unexpected, you can **be better prepared financially** with **MetLife Accident Insurance**.

You've got medical, dental and vision insurance — and possibly a flexible spending account just in case. If you have an accidental injury, you're financially covered, right?

Not entirely. Even the best health insurance may leave you with unexpected costs or medical debt, especially if you have a high deductible health plan or limited network. When faced with these kinds of costs, supplemental coverage from MetLife provides you with additional financial protection.

Help protect yourself, your family and your budget from the financial impact of unexpected injuries.

An example of how accident insurance can help

Accident Insurance helped Kathy pay some of her bills after she was involved in a hit-and-run. The great thing is that it was paid directly to her — she could use it how she wanted. She needed it especially for gas and the cost of a rental car. Kathy's advice is to always look ahead. It's better to have insurance and not need it, than not have it and need it. We all go through bad things, and hindsight is always 20-20. Take action, don't wait. *

Financial support so you can focus on getting well.

Many people may not be financially prepared to handle extra costs like plan deductibles, co-pays for emergency room care, testing, supplies and out-of-network care. For a covered event, accident insurance provides you with a benefit payment paid directly to you — not to your doctors, hospitals or healthcare providers.

You can spend the funds on anything you need, such as those extra bills when you may most need additional support. It can also help pay for expenses you may not think of, like childcare and transportation to your appointments. These costs can cut into your budget — and make it a challenge to manage your everyday expenses.
